 Orange Grove Estate, Orange Grove Road South,
 Tacarigua.
 Tel: 299-0795 ext.3336

NOTICE

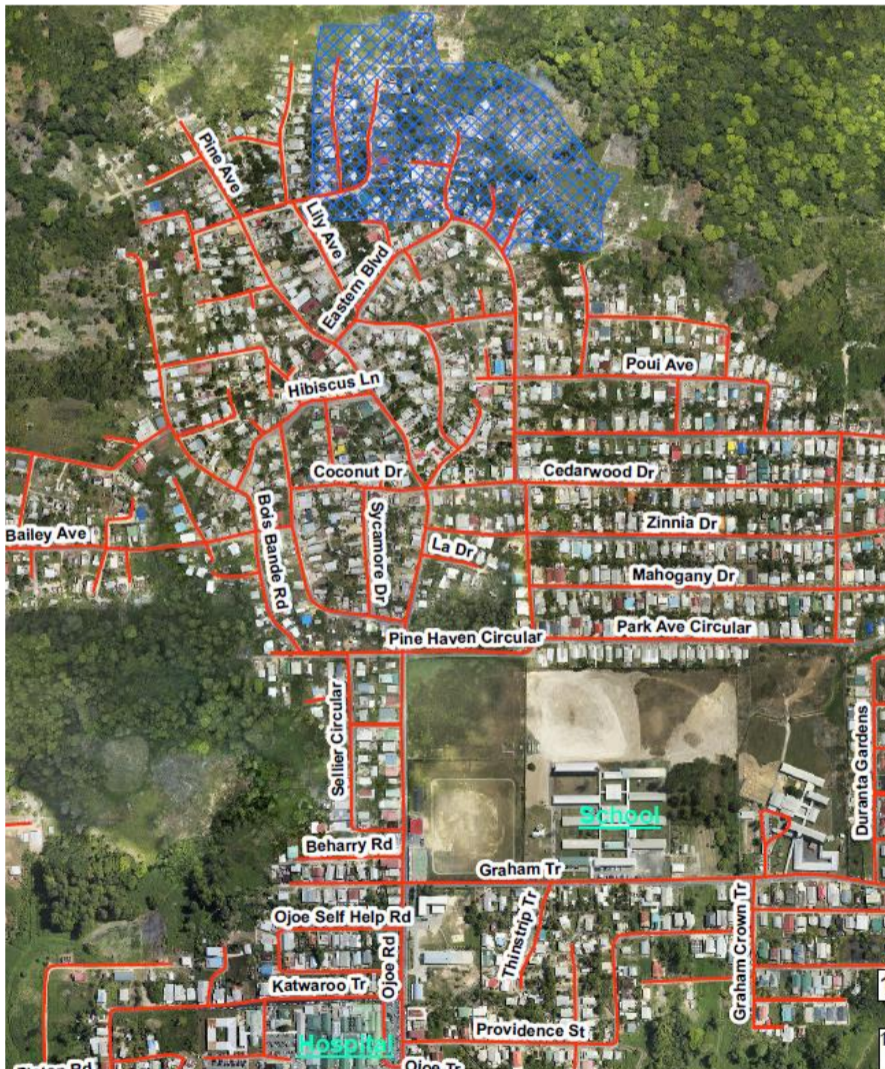

The Land Settlement Agency (LSA) has applied for a Certificate of Environmental Clearance (CEC # 5690/2019) in accordance with the Environmental Management Act of 2000 for The Establishment of Infrastructure and the Sub-Division of 13.96 Hectares of Land for the Regularization of a Squatter Settlement at Bois Bande Site C, Sangre Grande.

The works is planned to commence in February 2022 and would be undertaken over a 6 months period. The works will include the clearing and grubbing of land required for the construction of drains, detention ponds, development of new roads and laying of pipelines for a regular water supply.

These activities may result in certain negative impacts to your living environment such as construction noise, dust and the generation of waste. To prevent any likely environmental impacts the LSA will ensure that: there is regular washing of construction vehicles and wetting of the site; frequent collection and disposal of any waste generated as well as the placement of proper signage; construction works will only take place between normal working hours.

If you have any concerns or comments on the possible environmental issues involved with this project, please write your comments in the space provided in the signature sheet; alternatively further information on the particulars of the project can be found on the LSA's website at www.landsettlementagency.com which would give the date and a links for a virtual meeting to be held where the project will be discuss and concerns addressed. Your participation will be appreciated.
